## OUR STORY

---

Coffee. It's quite simply in our blood. In 1989 starting from a living room in Leeds, our parents began a journey into the coffee industry. From very small and humble beginnings, Coopers Coffee was founded, and became a national brand. As natural evolution goes, we were brought up in this industry and developed a keen interest from a young age. Fast forward to 2014, Coffee Brothers was born.

It's very much a family thing here with our team of dedicated coffee professionals who, in some instances, have worked with us as a family for over 25 years. Such as Donna, whom some of you may already know.

We pride ourselves on being a bit of a one-stop-shop when it comes to products and equipment. Whether it's setting up from scratch or developing your existing location to keep up with trends, we will have a solution for you. We have a fantastic range of off the shelf coffees and also offer fully bespoke options.

# 1989

From a spare bedroom in Leeds, UK, our parents formed the idea of Coopers Coffee, a one stop shop supplier for the coffee industry.

Over the next few years, they travelled the world and visited many origins to source the best coffee they could find. Some of these coffee blends are still with us today, such as Lou's blend, which was one of their first award winning creations.

This Company was sold in 2011.

# 2014

As the two sons of a coffee-mad family, we were brought up learning the trade. Fast forward to 2014 and Coffee Brothers was born, this time out of the garage of our family home.

We now provide coffee, machines, training and everything in between to businesses across the UK.

We also sell our coffee for domestic use and have an ever-growing range of blends available. Despite our recent growth, family still remains at the forefront of everything we do.

# 2018

This new business took off quicker than we initially expected, so we began to build a team and move into our very own warehouse and HQ in Honley, West Yorkshire.

## COFFEE, BUT WITHOUT THE JITTERS

When it comes to coffee without caffeine, there can be a real stigma about the lack of quality and flavour. We have upped our game with a well rounded blend and a beautiful water process single origin.

### MEXICAN

#### SINGLE ORIGIN

Almond, Sugarcane, Hint of Spice

#### ORIGIN

Mexico

#### MY STORY

The Mountain Water Process is a method of indirect decaffeination. The beans are submerged in water sourced and extracted from the Mexican Mountains.

This causes the water to then be saturated with the caffeine that was once present in the bean. Which leaves our coffee with 99.9% caffeine free coffee bean with its beautiful flavour still intact.

### BLEND

Dark Peanut, Chocolate

#### ORIGINS

Brazil, Vietnam

#### MY STORY
